

Lantern Orgs provides residual income and resources for non-profit organizations that foster social justice initiatives and serve those who have experienced systemic oppression in the workplace.

LANTERN  
ORGS

The funding we raise under Lantern Orgs allows HTE to support organizations who would not otherwise be able to raise funds and gain mainstream attraction on their own. HTE chooses each partner org carefully based on alignment of their mission and our own values. In partnership with these organizations, HTE produces educational content, videos, pitch packets and social media content to activate brand awareness. Relationships are long term and eventually develop into HTE partnerships that strengthen the infrastructure of our collective dismantling systemic oppression goals.

Founder, Mara. Lou

“Harriet tubman effect has helped me significantly as a theater maker and community leader. As a young producer, it’s imperative that I build networks and interact with new works to inform my practice and transform theater as we know it. Previously, I’d just accept that Bway shows are not accessible to me financially but Harriet tubman effects lantern tickets changed all of that! This initiative allowed me to see 3 shows that have absolutely rocked the way I see the future of theater and how I’d like to be a part of ushering in a new culture to make it a human first space.

As a community organizer, our organization has received invaluable support to keep our liberated space accessible and functional as we navigate instances of harm. The DEI and transformative justice centered practices have empowered us as a team and we are forever grateful for Harriet tubman effect. I talk about nicole and the organization any chance I get!”
